SCALE 1:350,000

The data portrayed was compiled from USGS 1:50,000 scale maps, 1:100,000 scale Digital Line Graphs, BLM 1:100,000 and 1:500,000 scale maps.

The surface and mineral status portrayed is for general planning and management use. Some of the lands, surface and mineral rights, may have been shown as patented lands due to the lack of information available in BLM or other data sources. These lands less than 40 acres may have been omitted because of the map scale. The official land records should be checked for accurate status of any specific tract of land.

No warranty is made by the Bureau of Land Management for use of the data for purposes not intended by the BLM.
